PROJECTS

Defender - Javascript/MySQL

- Developed "Defender": a flood management system with real-time weather data integration.
- Established an email-based messaging system for users to request flood-related assistance.
- Proficiently utilized APIs, payment gateways, and database management for a successful project.

Paytm UI Clone - Bootstrap5

- Demonstrated proficiency in front-end web development, including responsive design principles.
- Emphasized attention to detail and design aesthetics to achieve an authentic Paytm look and feel.
- Ensured cross-device compatibility, offering a seamless user experience on various screen sizes.

CERTIFICATIONS

- Programming Fundamentals
- Communication Skills
- Software Engineering - **NPTEL**
